

## ToughLED™ Anti-Corrosive

### JC71505

5ft Single

Light source: Integral LED  
 Total circuit Watts: 49W  
 Luminous flux: 4500 lumens  
 Efficacy: 92 LpcW  
 Colour temp: 4000K  
 Ra: 80

### JC71506

6ft Single

Light source: Integral LED  
 Total circuit Watts: 61W  
 Luminous flux: 5400 lumens  
 Efficacy: 89LpcW  
 Colour temp: 4000K  
 Ra: 80

### JC71507

5ft Twin

Light source: Integral LED  
 Total circuit Watts: 98W  
 Luminous flux: 9000 lumens  
 Efficacy: 92 LpcW  
 Colour temp: 4000K  
 Ra: 80

### JC71508

6ft Twin

Light source: Integral LED  
 Total circuit Watts: 118W  
 Luminous flux: 10800 lumens  
 Efficacy: 92LpcW  
 Colour temp: 4000K  
 Ra: 80

240V~ 50Hz

Class I

RoHS Compliant

IP65

BS EN ISO9001 - 2008  
 Registered Firm Certificate No. GB 1552  
 Drg No. JC71505-IS Issue: C - 03.12.15 - RCS

## Installation Sheet

Please read these instructions before installation and retain for future reference

### Important Information

It is recommended that luminaires are fitted by a qualified electrician to ensure that the installation complies with the current IEE wiring regulations BS7671: 2008. Any broken or damaged parts should be replaced as soon as possible. JCC will not accept responsibility for any claims arising from a sub-standard installation. **The light source of this luminaire is not replaceable : when the light source reaches its end of life, the whole of the luminaire shall be replaced.**

### Important User Advice

Always switch off mains supply before fitting or servicing. This luminaire is suitable for indoor and outdoor use.

### Installation Procedure

Single = 32.5mm / Twin = 58mm

Single = 25.5mm / Twin = 45mm

1. Mark and drill mounting holes for the snap-in ceiling clips at the correct spacing for the version being installed. Maximum/Minimum spacing for single/twin shown.
2. Affix clips securely to ceiling.
3. Clip the luminaire into place and ensure that it is secure before proceeding.
4. To gain access to the interior of the luminaire loosen the clips that secure the diffuser to the base section. Four of the clips are fitted with locking screws that will need to be loosened first. Two clips remain permanently attached to prevent the diffuser from falling.

Cut-away view

5. Separate the LED plate from the base by squeezing the securing clips inwards and pulling the plate away from the base. As with the diffuser there are permanent restraints that prevent the plate from falling during installation and servicing.
