

Skytile® Direct/Indirect

Installation guide for Skytile® recessed LED panels

Important information

- It is recommended that luminaires are installed by a qualified electrician to ensure the installation complies with the local current wiring regulations.
- Any broken or damaged parts should be replaced as soon as possible. JCC will not accept responsibility for claims arising from sub-standard installations.
- This product is for indoor use only and should not be covered by any insulated material.
- The light source of this luminaire is not replaceable: When the light source reaches the end of its life, the whole of the luminaire must be replaced.
- It may be necessary to upgrade your MCBs to allow for increased inrush current.

INSTALLATION

ENGLISH

- Read instructions and check that you have all of the tools and accessories required to complete the installation correctly. Isolate power supply before starting the installation.

Standard luminaire installation

- Remove the ceiling tile or tiles from the location where you wish to install the LED panel.
- Wire the LED driver to the mains supply as indicated in figure 1.
- Move LED panel into the ceiling aperture and when positioned halfway connect the driver low voltage output to the LED panel (luminaire) as shown in figure 1.a.
- Position the LED panel into place in the grid ceiling.
- Reconnect mains power supply and test for operation.

JC71376DALI Specification: Ra: 80
Wattage: 35 Watts
CCT: 4000K

Luminaire connection

220-240V 50/60Hz / Class II

DALI control wires
